

**Robert**

# Hutchings

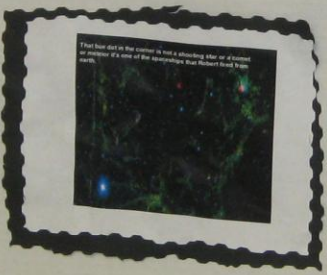

By Coleman Lynn

Second Grade  
Jewell Elementary  
2010-2011

**Goddard**

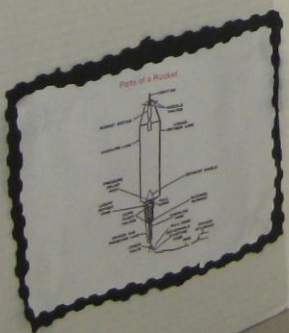

He built early high altitude rockets. Goddard shot the first liquid fuel rocket. He also built the first smokeless steering device for rockets.

That time that in the corner is not a shooting star or a comet or anything it's one of the airplanes that Robert Goddard built.

That is one of the things that Goddard built.

Parts of a Rocket

Goddard worked on many ideas making space flight possible.

His dream was the conquest of the upper Atmosphere. Ultimately, Space through the rocket's propulsion.

He earned his PH.D. in 1919. He was an American scientist. He shot the liquid propeller rocket. He was very coco about rockets it was just rockets Rockets!!  
ROCKETS!!!!!!

Goodbye

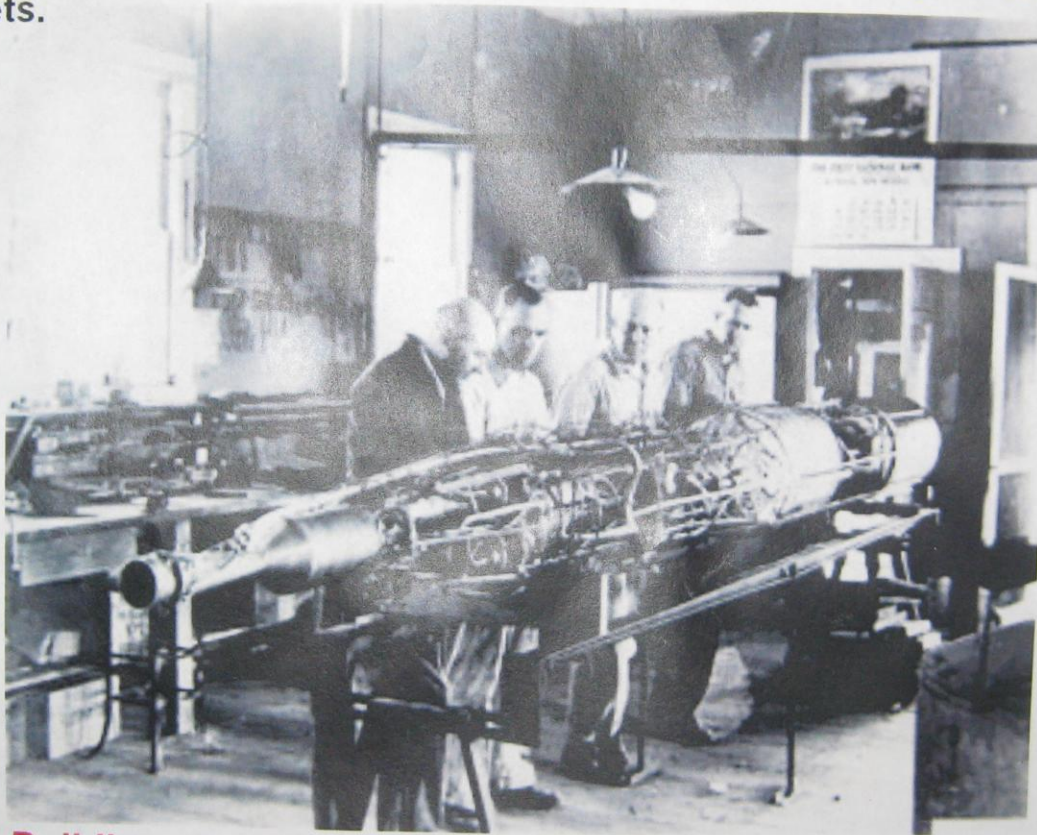

He built early high altitude rockets. Goddard shot the first liquid fuel rocket. He also built the the first smokeless steering device for rockets.

Building a Mini Rocket

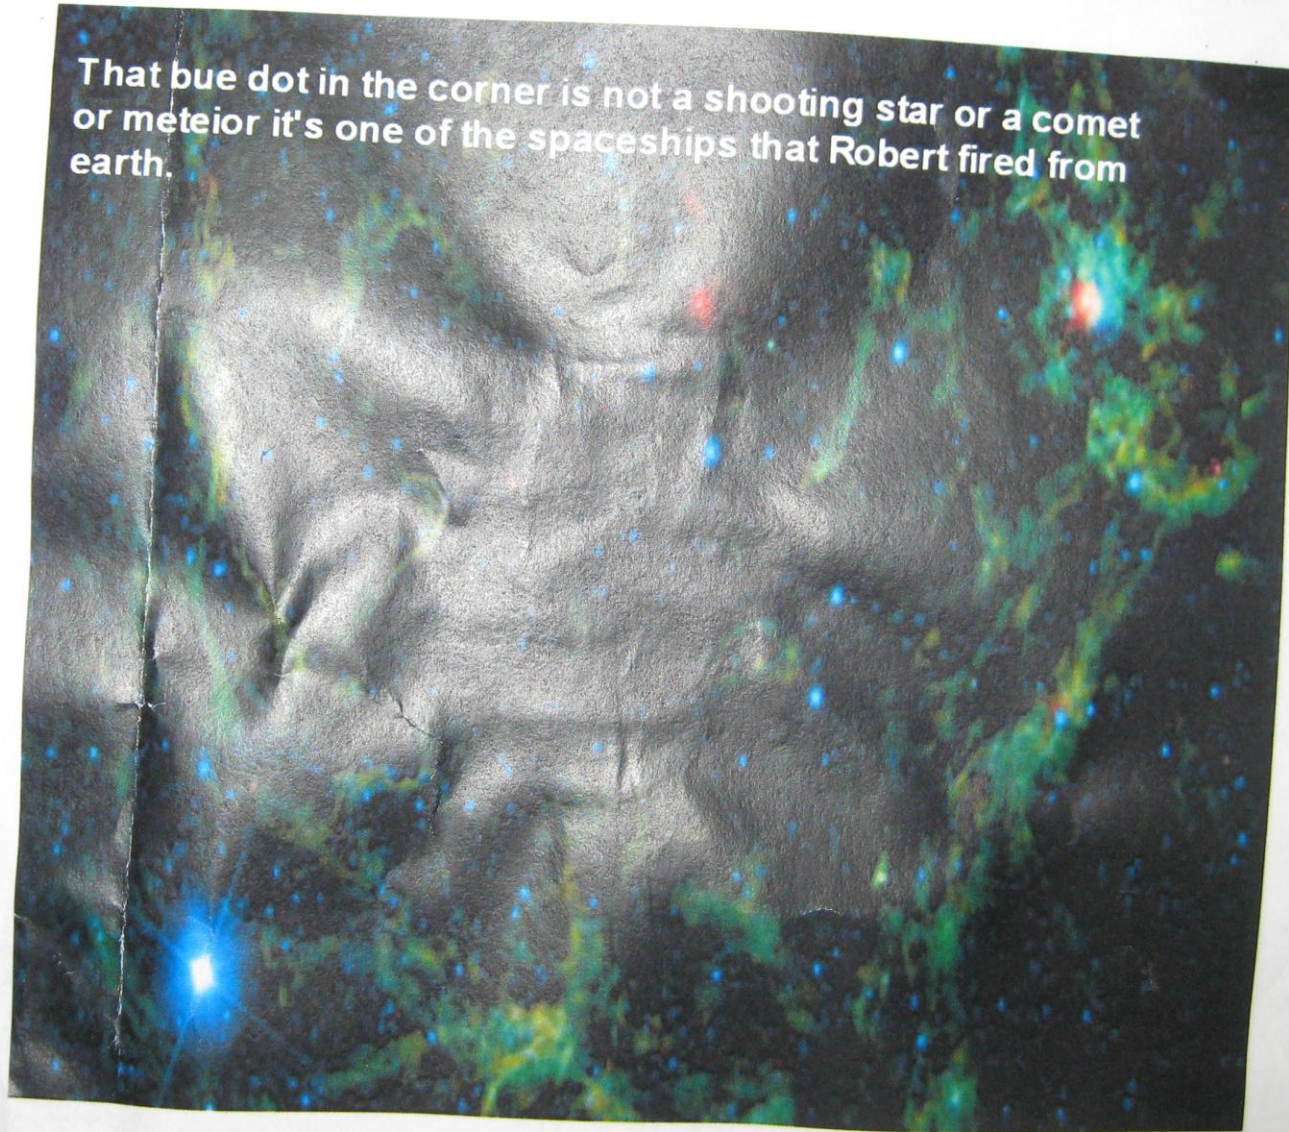

He built early high altitude rockets. Goddard shot the first liquid fuel rocket. He also built the the first smokeless steering device for rockets.

Building a Mini Rocket

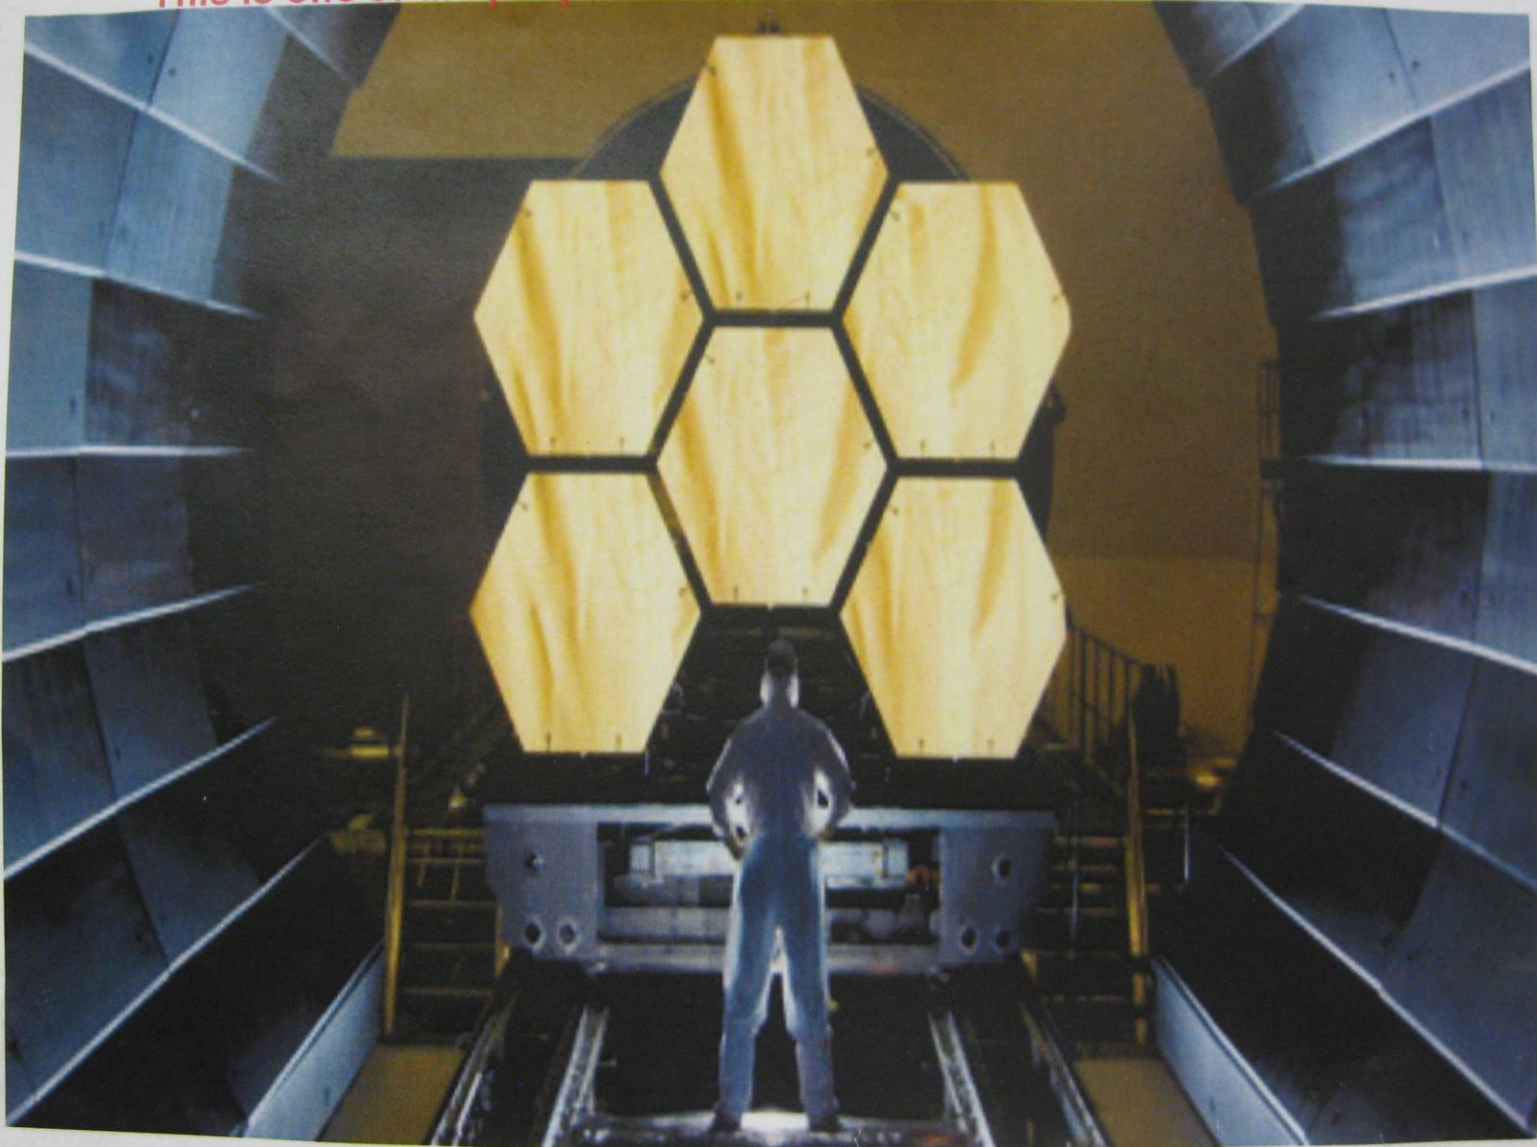

That blue dot in the corner is not a shooting star or a comet or meteor it's one of the spaceships that Robert fired from earth.

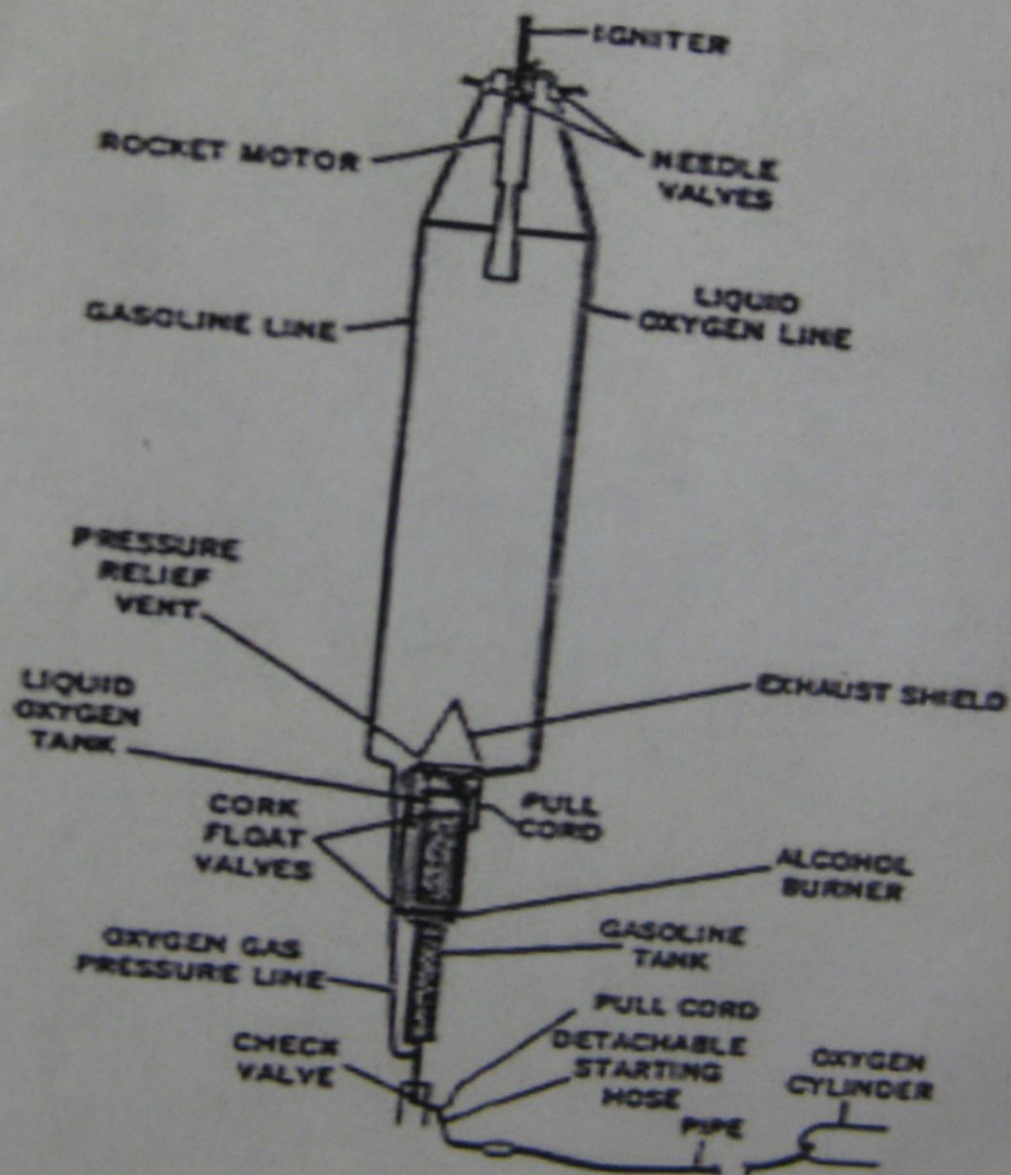

This is one of the people that worked with Robert.
